

Amendments to the claims:

This listing of claims replaces all prior versions and listings of the claims in the application.

In the claims:

Please amend the claims as follows:

Listing of Claims:

1. (Currently amended) A method comprising:

providing a first set of categories of broadcasted programs; and  
adding a category from the first set to a second set of categories of broadcasted programs in response to ~~one of~~ selecting the category from the first set and tuning a broadcasted program viewing device, for a period of time at least equal to a first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set.

2. (Original) The method of claim 1, further comprising:

removing a category from the second set upon a selecting of the category from the second set.

3. (Original) The method of claim 1, further comprising:

removing a category from the second set upon a broadcasted program viewing device not being tuned, for a period of time at least equal to a second predetermined threshold, to at least one broadcasted program predetermined to be in the category from the second set.

4. (Original) The method of claim 1, further comprising:

tuning a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

5. (Original) The method of claim 1, further comprising:

tuning a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

6. (Original) The method of claim 1, further comprising:

verifying the adding of the category from the first set to the second set.

7. (Currently amended) A machine-readable medium that provides instructions that, when executed by a machine, cause the machine to perform operations comprising:

providing a first set of categories of broadcasted programs; and

adding a category from the first set to a second set of categories of broadcasted programs in response to ~~one of~~ selecting the category from the first set and tuning a broadcasted program viewing device, for a period of time at least equal to a first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set.

8. (Original) The machine-readable medium of claim 7, wherein operations further comprise:

removing a category from the second set upon a selecting of the category from the second set.

9. (Original) The machine-readable medium of claim 7, wherein operations further comprise:

removing a category from the second set upon a broadcasted program viewing device not being tuned, for a period of time at least equal to a second predetermined threshold, to at least one broadcasted program predetermined to be in the category from the second set.

10. (Original) The machine-readable medium of claim 7, wherein operations further comprise:

tuning a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

11. (Original) The machine-readable medium of claim 7, wherein operations further comprise:

tuning a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

12. (Original) The machine-readable medium of claim 7, wherein operations further comprise:

verifying the adding of the category from the first set to the second set.

13. (Currently amended) A system comprising:

a first unit to provide a first set of categories of content of broadcasted programs; and  
a second unit coupled with the first unit to add a category from the first set to a second set of categories of broadcasted programs in response to ~~one of~~ selecting the category from the first set and tuning a broadcasted program viewing device, for a period of time at least equal to a first predetermined threshold, to at least one broadcasted program predetermined to be in the category from the first set.

14. (Original) The system of claim 13, wherein the second unit is also to remove a category from the second set upon a selecting of the category from the second set.

15. (Original) The system of claim 13, wherein the second unit is also to remove a category from the second set upon a broadcasted program viewing device not being tuned, for a period of time at least equal to a second predetermined threshold, to at least one broadcasted program predetermined to be in the category from the second set.

16. (Original) The system of claim 13, wherein the second unit is also to tune a broadcasted program viewing device to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

17. (Original) The system of claim 13, wherein the second unit is also to tune a broadcasted program viewing device, upon a singular pressing of a button, to a channel on which a broadcasted program predetermined to be in a category from the second set will be broadcasted within a predetermined threshold of a current time.

18. (Original) The system of claim 13, wherein the second unit is also to verify an adding of the category from the first set to the second set.
